

Yoda code base v1.2

Identify & Group Functions

Note:

some functions may overlap in other set

utils.js

1. `mongoObjectId`
2. `objectId`
3. `getUUID`
4. `sha384`
5. `hash`
6. `hashID`
7. `hashPassword`
8. `comparePassword`
9. `parseBoolean`
10. `parseNumber`
11. `parsePhoneNumber`
12. `dirCreate`
13. `getFileUpdatedDate`
14. `getFileInfo`
15. `getFilename`
16. `getFilenameWithoutExtension`
17. `geExtension`
18. `syncFileTime`
19. `setFileTime`
20. `loadJSON`

21. `loadJSONAsync`
22. `loadFile`
23. `pathJoin`
24. `compressString`
25. `decompressString`
26. `randomString`
27. `randomSringCrypt`
28. `cleanSlashes`
29. `escapeJSON`
30. `convertIfJSON`
31. `isValidIP`
32. `isValidIpv4Address`
33. `getIPAddressType`
34. `shallowCopy`
35. `deepFind`
36. `copyData`
37. `getFields`
38. `findObjectByFieldValue`
39. `clearBlanks`
40. `clearUndefined`
41. `removeSameFromSource`
42. `flatten`
43. `queryStringToObject`
44. `camelToSnakeCaseObject`
45. `objectToQueryString`
46. `sortObjKeysAlphabetically`
47. `copyObjectValues`
48. `flattenObject`
49. `parseDotNotation`

50. camelToSnakeCase
51. snakeToCamel
52. fetchData
53. fetchData2
54. baseAlpha
55. base62
56. shortenUrl
57. toUrlSafeBase64
58. parseURL
59. fromUrlSafeBase64
60. redisOptsFromUrl
61. addFastifyConfig
62. createWebhookPayload
63. sendMessage
64. sendData
65. sendText
66. getBody
67. getValidSubdomain
68. formatDate
69. formatBytes
70. getHealth
71. beep
72. hasGit
73. isEntryPoint
74. setLogger
75. versionCompare
76. sameDate
77. timeout
78. time

- 79. `timenano`
- 80. `timemicro`
- 81. `toArgs`
- 82. `toArgs2`
- 83. `splitItems`
- 84. `splitLines`
- 85. `splitter`
- 86. `csvToArray`
- 87. `arrayToCSV`
- 88. `shuffleArray`
- 89. `getRandomIntInclusive`
- 90. `numbersOnly`
- 91. `toFixedPlaces`
- 92. `checksum8`
- 93. `validateEmail`
- 94. `getValidSubdomain`
- 95. `makeTemplate`
- 96. `parseTemplate`
- 97. `getTemplateResponse`
- 98. `loadTemplates`
- 99. `unescapeHTML`
- 00. `escapeHTML`

logger.js

- 1. `createLogger`
- 2. `error`
- 3. `warn`
- 4. `info`
- 5. `http`

6. verbose
7. debug
8. silly
9. Logger

crypt.js

1. getRandomKey
2. encrypt
3. decrypt

aws-client.js

1. getSecret
2. getParameter
3. getParametersByPathSync
4. getParametersByPath
5. putParameter
6. isS3
7. parseS3
8. getSignedUrl
9. decrementDDBItem
10. incrementDDBItem
11. putDDBItem
12. getDDBItem
13. updateDDBItem
14. createTable
15. docQuery
16. docScan
17. docDelete
18. updateDynamic
19. query

20. `scan`
21. `sendSNS`

utils-q.js

1. `getQ`
2. `setQ`
3. `delQ`
4. `addQ`
5. `addToPostQ`
6. `setRedisUrl`

cache.js

1. `getKey`
2. `set`
3. `get`
4. `setP`
5. `getP`
6. `updateP`
7. `decrementP`
8. `setM`
9. `getM`

auth-main.js

1. `checkHeaders`
2. `getAuthz`
3. `getCustomer`
4. `sendWebhook`

utils-handlers.js

1. `init`
2. `twilio`

3. email
4. webhook
5. sns

auth-oauth2.js

1. addRequest
2. start
3. stop
4. getRequest
5. getToken
